

Summary

Results-driven Software Engineer with over 4 years of experience specializing in Java development, micro-services, and backend architecture. Backed by a strong problem-solving foundation and proficiency across multiple programming languages and modern deployment tools. Demonstrated ability to take full ownership of system architecture, guiding cross-functional projects from initial design concepts through to the successful implementation of scalable, real-time technical solutions.

SKILLS SUMMARY

- Languages** : Java, C++,C, JavaScript, Python3
- Frameworks** : Spring Boot, Struts, React JS
- Tools/Platform** : Postman, git, Tomcat 9, Weblogic-14, Eclipse, VS Code, EC2, Jenkins
- Database** : Oracle, MySQL, Postgres
- Concepts** : OOPS, Data Structure, Algorithms, Design Patterns, OS, DBMS
- Others** : J2EE, OIC, VBCS
- Soft Skills** : Good Listener, Team Work, Team Management, Excellent Communication, Leadership

WORK EXPERIENCE

Nielsen Media India Private Limited, SENIOR SOFTWARE ENGINEER

JANUARY 2025 – PRESENT

- Led the Java 8 to 21 migration:** Upgraded legacy applications to modern microservice standards, addressing major customer pain points and noticeably improving overall system performance and efficiency.
- Built Near Real-Time (NRT) capabilities:** Designed the Low-Level Design (LLD) and implemented features that successfully transitioned downstream systems to a faster, real-time data flow.
- Improved system observability:** Enhanced data consistency and proactive monitoring for legacy systems by setting up AWS CloudWatch alarms and developing custom alerting applications.
- Delivered customer-focused solutions:** Worked closely with stakeholders to understand user pain points, translating those needs into practical technical designs and delivering effective solutions.
- Resolved ongoing application issues:** Investigated complex system bugs, applied structural fixes, and improved internal processes to provide a smoother, more reliable customer experience.
- United and guided the team:** Fostered a supportive team environment, guiding technical execution and working together to successfully hit our project milestones.

Connection Consultancy, SOFTWARE DEVELOPER

APRIL 2023 – JANUARY 2025

Jaquar fittings, India

- Working As a Software Developer Primarily Managing project end Developed RESTful APIs to streamline functionalities across Inventory, Availability, and SAVR services.
- Enhanced Inventory service to optimize supply and demand management processes.
- Implemented Availability service to ensure accurate item availability tracking and management.
- Designed and integrated configurations such as safety stock, inventory locks, and eligibility rules within the Availability service.
- Worked together with cross-functional teams to enable full transaction transparency for business users, streamlining audits and enhancing operational efficiency.

Saudah Development

- Worked on revamping existing codebase to a micro-service architecture maintaining consistency with production workflows
- Enhanced the existing functionality of a self-service application which were getting used for the reimbursement of Child School Fee and Business Trip.
- Streamlined data storage procedures, resulting in a 10% increase in processing speed.
- Imbedded the approval workflow in the application.
- I have successfully Integrated the Payment Api in the self-service application.

IMMERSIVE INFOTECH

Sept 2022 – December 2023

Montran India,

- Engaged in the development of Kotak Mahindra Bank's PFMS system, managing change requests.
- Collaborated within a team to architect software solutions, employing Struts and Java technologies, and adeptly handling alterations and updates.
- Contributed to the creation of PFMS for Kotak Mahindra Bank, promptly addressing system modifications.
- Leveraged Java and Struts technologies in software design, ensuring swift and effective resolution of change requests in the role of

a software developer.

IPREP LEARNING SOLUTIONS

August 2021 – June 2022

- Contributed to a team in the creation of a framework.
- Developed a framework capable of generating unique mathematics questions and solutions dynamically.
- Automated various processes to enhance productivity.
- Implemented automated tagging for data classification purposes.

EDUCATION

Government Engineering College
Bachelor of Technology, **CSE** CGPA :7.0
Govt. School for Excellence.
Higher Secondary School, **PCM** 78%

Ujjain, Madhya Pradesh
June,2018 – March,2022
Ujjain, Madhya Pradesh
Mar,2017 – May,218

CERTIFICATIONS

- Completed java certification from hacker rank certificate, Hacker rank
- Completed React basic certification from hacker rank certificate, Hacker rank
